

# Garrett Felix

Software Engineer

## SUMMARY

Detail-oriented software engineer with a background in client service. Creative problem solver with ability to apply analytical developer skills in frontend and backend, in order to drive results and organizational impact.

## WORK EXPERIENCE

### Software Engineer at GoodieRun, Bothell, WA

August 2022 — Present

- Created web applications using Next.js and Node.js to facilitate food delivery and game day operations for stadium events.
- Developed point of sale systems for food vendors using Azure and SQL Server.
- Designed inventory tracking system to improve kitchen efficiency and reduce waste.
- Built out security group functionality, allowing for the creation and assignment of security groups to users.

#### Recent Projects:

**Bug Tracker (Fullstack Web App)** – Experienced in developing applications utilizing integrated SWR React hooks for efficient data fetching, caching, revalidation, and mutation. Proficient in customizing user permissions through assigning account roles, and adept at leveraging Cloudinary for cloud-based image storage solutions.

**Link-In-Bio Tool (Fullstack Web App)** – Developed a user-friendly and customizable link-in-bio tool for sneaker resellers, leveraging JavaScript, Node.js, and a custom API to retrieve shoe data from a vast database of over 300,000 shoes. Implemented features allowing users to effortlessly upload inventory using a barcode scanner and personalize their pages with colors and images, resulting in unique URLs for their businesses.

**Other Projects:** Dutch Bros Coffee Drink Generator, Sneaker Scanner, Discord to Google Sheets Inventory System, Shopify CSV Conversion Tool, and many more.

### Founder, Full Stack Web Developer at SneakerSync LLC | Bothell, WA

February 2023 — Present

Successfully acquired and retained 15 active users, demonstrating strong market validation.

Showcased the robust financial viability of the product by driving significant growth in Monthly Recurring Revenue.

### Client Service Associate at Swagerty & Gardner Financial Group | Bothell, WA

April 2017 — April 2021

Coded and maintained a Python script to automate the daily process of retrieving and reporting of financial data – saving 15 minutes per day.
